

## NILES AUDIO

## ZR-6 MultiZone Receiver

**How do you rate the ZR-6?**

An A-minus. The ZR-6 is an awesome system that provides the homeowner a multi-zone system beyond entry-level performance, at entry-level prices.

**For what applications is it best suited?**

This system is designed for the home where you have the kitchen, master bedroom, living room, pool area, with the option of setting up two zones in the future. Its power output far exceeds that of other systems which cost a lot more money. Most homes today don't have a lot of space for electronics, and the ZR-6 fits into most entertainment centers with a very small footprint.

**Describe its feature set.**

Simple programming and installation probably sets this apart from other multi-room systems. Not only does it setup quickly, but the user interfaces are very intuitive. This is probably one of the first systems that we have used at this price point with true metadata available on the in-wall keypads. The flexibility to expand to 18 zones and a built-in IR sensor for some of the keypads really distinguishes the ZR-6 as one of Niles' best feature set designs for the masses.

**What features would you like to see changed?**

Being able to add or include HD radio would really step the system up a notch. So many stations have upgraded their transmitters over the summer that we have noticed a significant increase on the stations we receive in our design center on the Niles GXR-2 system.

## THE REVIEWER...

Tom Samuelson is sales and design manager for Atlantic Smart Technologies (561.776.0066, [www.atlanticsmart.com](http://www.atlanticsmart.com)) in Jupiter, Florida. He designed his first system in 1983, and after four years in the military and five years touring with a rock band, he settled down into the CI industry. With a music background and a passion for audio,

Samuelson is still amazed to see his audio system designs move from paper to fruition. He has been a Niles Audio dealer for 15 years.

**IN HIS OWN WORDS...**

"No two days are ever the same. Every day offers new challenges, either from the client, builder or architect, and even manufacturers in some cases."

## PRODUCT SPECS

- ▶ Six-source, six-zone whole-house audio receiver
- ▶ One-touch to entertainment automation
- ▶ Plug-and-play iPod integration
- ▶ Built-in AM/FM tuner
- ▶ Distributes and displays metadata
- ▶ Control solutions include the TS-PRO color touchscreen controller and weather-resistant keypads
- ▶ Features an intuitive, built-in wizard
- ▶ Retail at \$1,995.00 and is now shipping

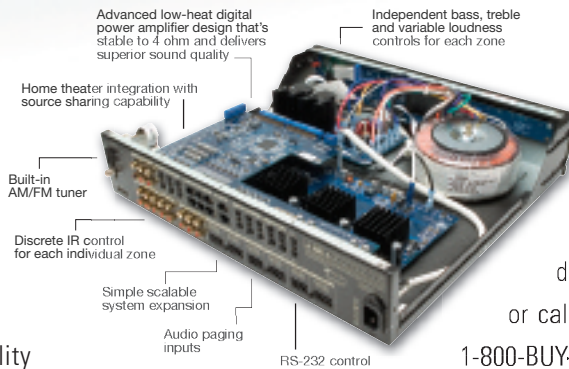

Weather-Resistant Keypads

# WINNER BY A KNOCKOUT: ZR-6 ELECTRONIC HOUSE 2008 PRODUCT OF THE YEAR

The critics agree: the Niles ZR-6 MultiZone Receiver hits the "sweet spot" with

features like plug-and-play iPod® integration, weather-resistant keypads that display metadata from today's digital sources, a built-in AM/FM tuner, and a gutsy 12-channel digital amplifier that delivers audiophile quality

sound and is stable to 4 ohm. All that, plus the reliability and support you expect from Niles. For more information, contact your local Niles Sales Representative to arrange a personal demonstration, or call us toll-free at 1-800-BUY-HIFI (289-4434).
