

FOR IMMEDIATE RELEASE

THE FIRST NAME IN CUSTOM INSTALLATION®

Niles Brings Residential and Commercial Installation Solutions to Integrators at ISE 2010

Revolutionary IR sensors and award-winning color touchscreen to be on display at booths 1K22 and 1K31 at international audio/video show

MIAMI, Fla. – January 20, 2010 – [Niles](#) Audio Corporation, The First Name In Custom Installation®, announced today it will showcase a complete array of loudspeaker, home system and integration solutions, including the industry’s first [High Fidelity Wideband IR Sensors](#) and the award-winning [TS-Pro](#) Wall-Mount Color Touchscreen, at [Integrated Systems Europe 2010](#) (ISE). Attendees to ISE 2010 can experience Niles’ offering of custom installation solutions alongside its European distributor, BMB Electronics, at booths #1K22 and #1K31 February 3-5 in Amsterdam.

“We look forward to presenting the latest in ground-breaking custom installation solutions to attendees at ISE 2010,” said Frank Sterns, president of Niles. “At Niles, we have a great understanding of the unique needs of custom installation professionals which is why we’ve developed products—such as the new line of IR sensors and the TS-Pro—to enable them to easily and effectively design and install systems that far surpass their customers expectations.”

Niles’ new IR Sensors utilize high fidelity wideband amplification to ensure compatibility with virtually all current and emerging IR code formats, including the new Philips RCMM code structure. The High Fidelity Wideband IR Sensors are designed to optimally amplify and carefully preserve IR signal integrity. This unique sensor design is able to pass the low duty-cycle, high data rate IR signals found in many new source components, such as HD cable boxes and satellite receivers. Paired with Niles’ patent-pending Universal Noise Suppression technology, which implements more than 10 different methodologies to ensure effective and reliable operation in a multitude of “noisy” environments, Niles IR Sensors offer professional systems integrators a universally capable IR sensor solution for any application.

The TS-Pro wall-mount color touchscreen is an advanced, customizable control solution for Niles' award-winning [ZR-6 MultiZone Receiver](#). The easy-to-use TS-Pro features a high-contrast, 3.5" color touchscreen with a crisp, easy-to-read graphical user interface (GUI) and convenient hard keys that control frequently used functions such as volume and power on/off. Easily configured without a laptop computer, the system integrator simply connects the TS-Pro to the ZR-6 and the system programming is automatically loaded. Also, system changes made in one TS-Pro are automatically populated to all other TS-Pros in the system.

Attesting to Niles' commitment to provide custom installers around the world with the latest in high-performance, application-specific products, both the new line of High Fidelity Wideband IR Sensors and the TS-Pro have been named finalists for the [2010 EMEA+ InAVation Awards](#), which celebrate the best in the audio/video systems industry throughout Europe, the Middle East, Africa and beyond. Winners of this year's InAVation Awards will be announced at ISE 2010.

Talking Points

Niles Audio Corporation announced it will exhibit new products in booths #1K22 and 1K31 at ISE 2010, held February 3-5 in Amsterdam.

Among the products exhibited will include the industry's first High Fidelity Wideband IR Sensors and the award-winning TS-Pro Wall-Mount Color Touchscreen

Niles' new IR Sensors utilize high fidelity wideband amplification to ensure compatibility with virtually all current and emerging IR code formats, including the new Philips RCMM code structure

The TS-Pro wall-mount color touchscreen is an advanced, customizable control solution for Niles' award-winning ZR-6 MultiZone Receiver

Niles' Hi High Fidelity Wideband IR Sensor line and the TS-Pro have been named finalists for the 2010 2010 EMEA+ InAVation Awards

About Niles Audio Corporation

Miami-based Niles Audio Corporation is a 31-year-old company recognized as The First Name in Custom Installation®. The company is a leading designer, manufacturer and marketer of audio/video custom installation products and accessories and is guided by its vision to be the world's leading provider of products and services that enable professional custom installers to design and install systems that delight their customers. To that end, Niles pursues a mission to provide solutions for end users which enable simple and easy access to home entertainment and that integrate seamlessly with other low voltage subsystems like lighting, internet, security and HVAC in residential and light commercial environments. Niles conducts its business with a promise to treat its customers, employees, suppliers and stakeholders with fairness and respect and to foster teamwork, innovation and a commitment to be the best in everything it does.
