

DMS4 DIGITAL MUSIC SERVER

THE ONLY DIGITAL MUSIC SERVER EXPRESSLY DESIGNED FOR INTELLICONTROL[®] ICS

The DMS4's true plug-n-play integration with the IntelliControl ICS system provides a distinct advantage over third party music servers by offering streamlined installation, enhanced reliability, and a more satisfying listening experience.

FEATURES AND BENEFITS

Two-Way Metadata Feedback provides CD titles, artist names, track names, etc., to be automatically and instantly displayed on compatible IntelliControl[®] ICS user interfaces as soon as a new disc is recorded.

Four Simultaneous Music Streams give you and your family complete access to the entire music collection so everyone can listen to what they want, when they want.

Flexible Recording Quality takes full advantage of the DMS4's large capacity Hard Drive. The DMS4 provides three different recording formats: Uncompressed WAV, MP3 and WMA. Additionally, within the MP3 format there are three quality levels to record at: 320K Constant Bit Rate and two Variable Bit Rates of 192k and 128k. The WMA format has two Constant Bit Rates to record at: 128k and 96k. These choices allow you to store music on the DMS4 160GB Hard Drive based on recording quality, storage capacity or personal preference. The DMS4 Hard Drive is capable of storing thousands of hours of music which can be accessed quickly and easily at the touch of a button.

Convenient, Easy-To-Use TV Interface enables you to play music, record CDs, or organize your music library using convenient on-screen menus which display the full album, artist and track names.

Automated Album Information Retrieval provides you with the most flexible and intuitive way to access and control your music collection. After the DMS4 records a CD, it automatically connects to the Gracenote Music Recognition Service via its Ethernet connection and downloads album and track details for virtually every CD in your collection. The information is stored with each CD and allows you to select music by name or genre.

Compile Customized Play Lists Quickly and Easily. Playlists allow you to customize your DMS4 Digital Music Server for each member of the family or set the scene by matching the music to the occasion or mood. Playlists can be created via the front panel, remote control, keypad or TV interface.

DMS4 DIGITAL MUSIC SERVER

STOCK# **FG01178**

FEATURES

- Digital Music Server delivers up to 4 independent streams of music in your choice of popular formats
- Plug-and-Play integration with the GXR2 and build 106 or above of IntelliFile3 System Configuration Software (requires individual IM-Server card per music stream)
- Provides Genre, artist, album, song and track number to IntelliControl®ICS display-equipped keypads and remote controls
- Alphanumeric search and access of artist, albums, songs, etc
- Internal 160 GB hard drive
- An on-screen interface provides full control over all server functions and playlist generation from a TV location
- Front panel display/controls provide full control over all server functions and playlist generation
- Internet access for metadata retrieval
- Accommodates both lossless and compressed recording formats: WAV, MP3 (320k constant bit rate and two variable bit rates of 192k and 128k), and WMA (two constant bit rates using 128k and 96k)
- Rack mounting requires Middle Atlantic RSH Kit

SPECIFICATIONS

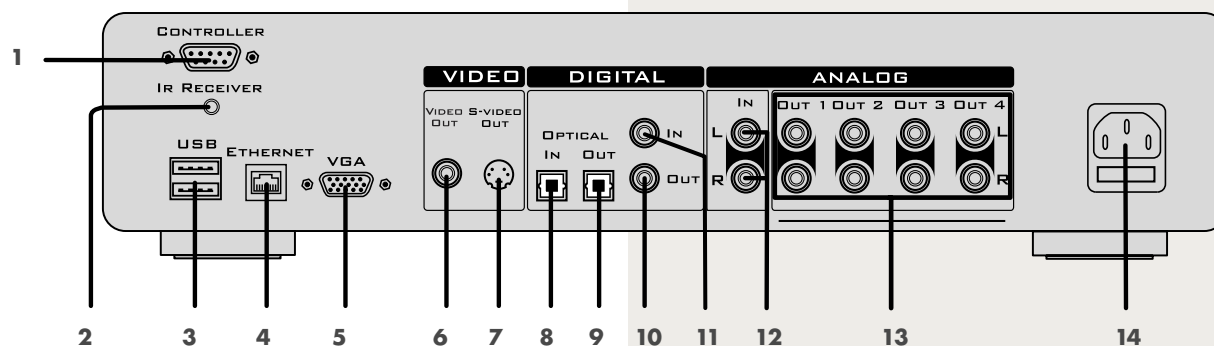

- Storage Space:
160GB Hard Drive
- Power Requirements:
AC 100-240V~50Hz/60Hz
- Power Consumption:
60W Max
- Ambient operating temperature:
10-40°C/50-104°F
- Operating humidity:
10-90% RH (non-condensing)

DIMENSIONS

- 4"(h) x 17.2"(w) x 14.4"(d)
- 101mm(h) x 437mm(w) x 367mm(d)

WARRANTY AND SHIPPING

- Warranty: 1 year from the day of purchase
- Shipping: Weight: 8.5kg Max
