Subject: EZ-Crimp RJ-45 Connectors

Page 1 of 1

Please be advised that EZ-Crimp type RJ-45 connectors are not compatible with the ZR-4630 MultiZone Receiver, A4.6Ci MultiZone Preamplifier, or IntelliPad Ci Keypad Systems. This type of connector does not work well with these products because the exposed copper wire at the end of the connector can cause a short when inserted into the RJ-45 jack. A short will cause the units to lock up until the short is removed and the unit is reset.

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday through Friday.
