Re: HDLCR Loudspeaker Brackets

Niles will soon begin filling orders for the new HDLCR Home Theater Loudspeakers. New construction brackets for these speakers will be called LCR/FX Bracket Kit and will be designated FG01152. During the transition period between current bracket kits and the new bracket kit, the HDLCR may be installed into existing CTR/LRS brackets.

When installing the HDLCR into the CTR/LRS bracket, care should be taken to avoid contact between the negative speaker terminal and the new construction bracket. There is no risk of damage but it may result in the negative speaker wire being disconnected from the speaker terminal. The possible point of contact is illustrated in the photos below.

Since the LCR/FX brackets have been designed specifically for use with the HDLCR, they provide adequate clearance and therefore present no installation issues.

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday through Friday.
