RE: IntelliFile3 and Vista Compatibility

With the release of Windows Vista Niles Technical Support has begun receiving inquiries about the compatibility of IntelliFile3 software with the new operating system. Our engineering staff has determined that there are several incompatibilities with the IntelliFile3 programming software and Vista. Our software team is currently testing and implementing the necessary changes to insure full compatibility. Until an official announcement is made however, please continue to use computers running Windows XP for programming the Niles ICS system

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday - Friday.
