From: John Hamilton
Subject: New Improved Intellicontrol with Extended Range

Page 1 of 1

The new Improved IntelliControl with extended range incorporates the following improvements:

1. The main board design has been reworked. This results in a substantial increase in speed of operation.
2. The RF chipset has been redesigned to improve overall reception. This redesign dramatically reduces external interference.
3. The New Improved Intellicontrol with extended range now ships with a supplied whip antenna, 6 meter extension cable and a mounting bracket. This expedites installation and substantially improves overall reception and performance.
4. The internal memory capacity has been upgraded from 2MB to 4MB. This eliminates the need for the memory expansion chip(FG000735).

Thank you for your continued support,
John Hamilton
