Re: ICS BKT-2 Bracket

The initial order of the Niles IntelliControl ICS BKT-2(FG01192) new construction brackets (for the Display and Contact keypads) began shipping to dealers last week. It has come to our attention that, while the bracket easily accepts both keypads it was designed for; its dimensional tolerances for dry wall cutouts are very tight. Niles is currently improving the mechanical design of the BKT-2 and all future brackets will allow for a greater degree of leeway in the dry wall cutout.

Please note: If you have received BKT-2 new construction brackets from this initial shipment the dry wall cutout must be very tight against the bracket to insure that there are not any gaps exposed on either side of the keypad bezel after final installation.

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday through Friday.
