Subject: SI-1230 amplifiers

Page 1 of 1

It has come to the attention of the Technical Support Department that SI-1230 amplifier has under gone a minor Engineering change. The change affects the physical appearance of the Active L.E.D. on the front panel. The L.E.D. color has changed from Red to Green when the SI-1230 is in the Active state. This change is to match our two-channel amplifier's appearance when they are active.

Should you have any questions concerning this bulletin please call Niles Technical Support at: **1-800-289-4434** or e-mail us at: **tsupport@nilesaudio.com**

Thank you for your continued support,
John (JR) Hayhurst
Technical Support Manager
