Subject: TS-1 IntelliPad® Ci Touch Screen Programming Cable

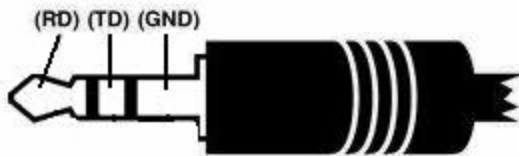

Page 1 of 1

---

Tech Support has begun receiving inquiries about what type of cable should be used to connect the TS-1 IntelliPad® Ci Touch Screen Keypad to a computer when programming via a PC. The correct cable has a nine pin serial connection at one end and a 3.5mm stereo mini plug at the other end. Niles does not distribute such a cable but it can be obtained in several ways.

1. Kodak distributes a Serial Interface Cable for digital cameras that is fully compatible with the TS-1. The part number for this cable is CAT 115 7619.
2. The Philips Pronto transfer cable is also fully compatible with the TS-1.

Other cables, such as the Universal MX-700 cable may be similar in appearance to the cables mentioned above, but due to differences in pin configuration are **not** compatible with the TS-1. Also, please be aware that some cables have a double ground on the 3.5mm plug (see illustration below). These cables are not compatible with the TS-1.

Right

Wrong

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday through Friday.
