

Niles Technical Bulletin

With the Niles ZR-6 MultiZone receiver, that features plug and play iPod integration, now shipping, Niles Technical Support would like to make dealers aware of changes to iPod integration with our latest MultiZone receiver.

Apple has recently instituted several changes to the interface of the iPod, requiring their licensees to implement these changes in any new product. These changes, which include a new charging scheme, have been incorporated into the ZR-6 MultiZone receiver. Because of these changes the ZR-6 is not compatible with Niles' current line of iWare product. This includes the SmartDock® iPod docking station and the ES1 wall-mount iPod extender system. While these products will physically connect to the ZR-6, they will not function. Development of a new line of iWare products that are fully compatible with the ZR-6 and future Niles MultiZone products is currently underway, with an expected ship date to dealers of late 2008.

Should you have any questions, please feel free to contact Niles Technical Support at 1-800-289-4434 between the hours of 8am and 7pm Eastern Time, Monday - Friday.

Sincerely,

John Hamilton
Manager, Niles Technical Support
